

National Alliance of Canadian Optician Regulators

Prior Learning and Assessment Recognition Process (PLAR) Registration Package

A) Application for Registration with Non-Accredited Education

Canadian and international applicants who have not graduated from a Canadian accredited program may be accepted for registration when they have a combination of knowledge, skills, experience and abilities, which are substantially equivalent to the requirements for new applicants. These applicants will complete a Prior Learning Assessment and Recognition process (PLAR).

The PLAR process consists of a document review, Competency Gap Analysis (CGA) and Case-Based Interview.

The CGA is a supervised online multiple choice assessment, the Case-Based interview (CBI) is an interview which is conducted either in person or remotely through electronic methods. Both the CGA and CBI are based on the competencies in the *National Competencies for Canadian Opticians*.

The scores on the CGA and CBI are combined in a computer generated score card known as an Integrated Candidate Scorecard (ICS). The results are used to determine if there are any gaps in the candidate's knowledge and skills. If additional education is required bridging modules will be assigned to upgrade the candidate's knowledge and skills.

To begin the process, complete the application form including the required additional information and return it to the NACOR office.

Please contact general@nacor.ca if you have any questions or require assistance.

For more information on the PLAR process and the *National Competencies for Canadian Opticians* visit www.becomeanoptician.com

Successful PLAR candidates will be required to pass the NACOR National Examination(s) prior to being eligible for licensure in any province in Canada. For more information on the National Examination visit the NACOR website at www.nacor.ca
